

# LMR Drilling UK Ltd.

## No-Dig Awards 2002

We are pleased to announce that LMR Drilling UK Ltd., a World leader in the industry, have had two of their recently completed Horizontal Directional Drilling contracts shortlisted by the UK Society of Trenchless Technology and the World-wide International Society of Trenchless Technology for awards from amongst a large number of entrants all over the World. The projects are :

- ❑ **Nailsea to St. Georges Pipeline**, a 48" dia. x 904 m length peat and rock crossing for Transco - Main Contractor, Entrepouse.
- ❑ **Macduff Sea Outfall**, a 445 mm dia. x 240 m length rock outfall drill for the North of Scotland Water Authority - Main Contractor, Van Oord.

We are very pleased to announce the Nailsea to St. Georges project was awarded the 1<sup>st</sup> Prize in the New Installation Large Project section by the UKSTT, and was placed 3<sup>rd</sup> by the ISTT for the most notable advance or achievement in Trenchless Technology, both awards sponsored by No-Dig. These awards were gratefully received by LMR Drilling UK Ltd. as recognition of the efforts that staff in the UK and Germany had produced to successfully complete two very different contracts.

**2002 UKSTT's No-Dig Award for New Installation Large Project – Horizontal Directional Drilling of a 48" Dia. Crossing on the Nailsea to St. Georges Pipeline**
